

CHRISTMAS GREETINGS

2012

On the island of Java, a much rebuilt Schöma 700mm gauge diesel locomotive shunts empty cane trucks at Padjarakan sugar mill on 20 July 2012. Numbered 04 and believed to be one of Schöma 1246 to 1248 of 1951, it started off at Jatiroto sugar mill as a 4wDM but has been rebuilt to 0-4-0DM at Padjarakan and fitted with the engine cover from an Orenstein & Koppel diesel.

Many thanks to all those who have assisted me through generously sharing information, including everyone who has contributed to *"Light Railways"* over the last 12 months.

All best wishes for Christmas and a great year in 2013.

John Browning
