

## 2012 MRQC Reference List for Queensland Modellers

### Magazines, books, etc.

**AMRA Qld** (Australian Model Railway Association). 'Railways of Queensland' volumes 1 to 6. Photographic coverage, both black and white and colour of Queensland rail subjects. Some copies still available from AMRA and other outlets.

**John Armstrong's** MRQC convention books. 'Modelling the Qld.Railways Scene' (2004); 'Wooden Wagons of QR 1880-1980' (2006); 'Iron & Steel Wagons QR Steam Era' (2008); 'Wooden Carriages of QR' (2010) and 'Brake Vans of the Queensland Railways 1864-1980' (2012). Very limited print runs, a lot of useful information for modellers of the Queensland scene if you are lucky to obtain copies.

**Australian Model Railway Magazine**. Rail operations, prototype articles, modelling articles, photographs, etc., which have appeared in AMRM since May 1963 are listed below. Back issues are still available in print form (1981 on). Early issues are now also available on CD with 12 issues on each CD. At the time of compiling this list (April 2012) Issues 1 to 129 (11 CDs) were available. AMRM has been a long time supporter of this convention and the availability of this material is certainly of assistance for all modellers.

**Australian Narrow Gauge Railway Museum Society**. Books, CDs and models available from their operating museum at Woodford, train shows and on line. (See web listing below.)

**Australian Railway Historical Society**. Another good source of information. *Bulletin* articles on Queensland subjects have appeared over many issues. These are also available on CD. (10 years per CD) through their NSW sales centre. There have also been many publications on Queensland subjects by the Qld division. Some of these are still available from the ARHS and various retail and second hand outlets (Train & model shows).

**ARHS Qld Division**. *Sunshine Express* magazine dealing with various Queensland subjects. Probably hard to find back issues, the Qld Division may be able to assist.

**Australian Sn Modeller**. Specialist magazine catering for 'S' (1:64) modellers of narrow gauge Australian modelling. Available by subscription only (refer page 7 for contact details)

**Branchline Modeller/Australian Journal of Railway Modelling**. Two useful articles for HO on 3 1/2 modellers. Issue #3, 'A Narrow Gauge Loco Mechanism' (AR 45 class bogies modified) and Issue #8 'Narrowing Athearn SD-9 bogies to 3' 6" gauge). This publication also had plenty of other useful modelling articles. (Some issues may still be available from Gwydir Valley Models)

**Eveleigh Press Publications**. (SCR Publications/Australian Model Railway Magazine). Australian Diesel Scene #3, 'The Wallangarra Goods', #4 'Kevin's Night of Drama' (Moreton Mill Story) and #5 'Sarina and Environs'. Qld The Blue and White era. Photographic coverage of QR diesel locos.

**Light Railways**. (Light Railway Research Society of Australia). As well as current Qld cane line operations, articles on Queensland railway and tramway subjects appear from time to time. They also have a good selection of Queensland publications from their sales section.

**Modelling the Railways of Queensland Convention**. Presenters notes from each convention in book form. If you can find copies they are worth acquiring/keeping. Some notes available on the Convention web site (see below).

**Narrow Gauge Down Under**. Freelance and prototype modelling articles with an emphasis on tramway and other narrow gauge modelling.

**Train Hobby Publications**. 'Railway Stations in Queensland (Country and Greater Metropolitan Brisbane, 2 volumes) and 'Country Railways of Queensland' (part one). Full colour photographic coverage of stations, and trains in Queensland. Plenty of detail and ideas for modelling. Available from various outlets.

**Lynn Zelmer's** Rail Heritage/Modelling, etc. Web site managed by Lynn Zelmer covering rail heritage and rail/tram modelling sites (refer web listing below).
