

Truss = Two rafter units,  
ceiling joist & gussets.  
Rafters/ridge board  
more accurate  
for era  
built.

Truss  
easier to  
construct than  
rafter/ridge board.

Full 3D treatment of rafter unit (truss)  
requires care in folding and cutting.

The result is a two-sided multi-  
layer truss unit suitable for a  
competition model with a  
removable roof.

Remember to tint  
all edges before  
gluing.

Fold and glue before removing this area

**Print four copies (10 units  
required). Layer extra  
components to create  
3D effect if desired.**

**Duplex Crew Quarters**

**O scale 1:48 @300 dpi**
