

On30 (1:48) scale Template for CSR type Portable Track Sections

Cut material for sleepers 3/4" wide by long enough for the number of sleepers desired. Emboss the sleeper 'dish' and cut individual sleepers 1/8" wide (ie 3 scale feet by 6 scale inches).

Template designed for Code 40 rail.

Sole plates and fish plates need to be cut to fit.

Note that prototype had four bolts per sleeper if installing nut/bolt castings.
