

## SAFETY ON THE SUGAR CANE RAILWAY

The 2011 crushing season is expected to commence in the second half of June. The actual start date will be finalised pending the estimate for the crop. However it is expected that cane rail operation will start to commence around 14 June 2011 from Smithfield area in the north to Fishery Falls in the south.

**Unsafe practices** include children playing on the cane railway property, fishing on cane railway bridges, joy-riding on cane bins or riding trail-bikes along the cane railway. As you will appreciate, all these practices are extremely dangerous and your assistance in keeping children away from the cane railway line could prevent serious injury.

**Mulgrave Central Mill** will be promoting its "Cane Train Awareness 2011" program throughout the 2011 crushing season which will extend from June to November.
