Scratch Building a Corrugated Goods Shed

“HO-Scale Masterclass Modeling from the Land Down Under”

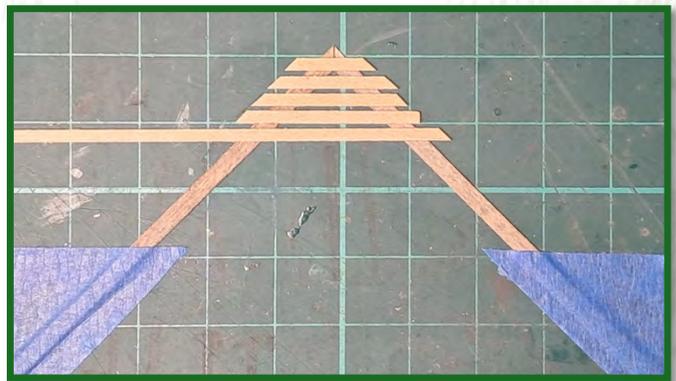

by Craig Veitch, New South Wales, Australia

Scratch-Built Stairs

Tape two 1x8 stringers together. Glue 1x6 spacers (2 inches long) across at riser height. Separate them, and you've just assembled left/right stringers with perfect tread slots. Drop in 2x10 treads. Adjust the angle between the stringers to fit any pitch; the treads stay parallel and are mechanically secure locked.

Happy Modeling!
— Craig Veitch, NTM

Scratch-Building a Corrugated Goods Shed in HO-Scale

Happy Modeling!
